

Closed patient suction system

Closed suction

A whole range of problems are encountered during long-term ventilation in everyday hospital practice. We have developed the OptiFlo closed suction system in order to make ventilation especially safe and hygienic, both for patients and nursing staff.

Optimal safety and infection prevention

Closed suction minimizes the danger of cardiac and pulmonary complications. On top of this, OptiFlo possesses many properties which prevent infections and facilitate care.

The long usage time of 48 hours often reduces costs for your hospital.

Immediately ready to use

- 48 hours usage reduces costs
- more hygiene and safety

Double-swivel connector

Atraumatic catheter tip

Secretion sight glass

Neonatal, Y-connector

	Size	Length	Packaging unit	REF
	CH 05	31 cm	60	43.004.60.050
	CH 06	31 cm	60	43.004.60.060

Pediatric, Y-connector

	Size	Length	Packaging unit	REF
	CH 07	31 cm	60	43.004.60.070
	CH 08	31 cm	60	43.004.60.080

Adults

	Size	Length	Packaging unit	REF
	CH 10	54 cm	60	43.004.60.100
	CH 12	54 cm	60	43.004.60.120
	CH 14	54 cm	60	43.004.60.140
	CH 16	54 cm	60	43.004.60.160
	CH 18	54 cm	60	43.004.60.180

Adult, extra-long version

	Size	Length	Packaging unit	REF
	CH 12	60 cm	60	43.004.66.120
	CH 14	60 cm	60	43.004.66.140
	CH 16	60 cm	60	43.004.66.160

Adult, tracheostomized patients

	Size	Length	Packaging unit	REF
	CH 12	34 cm	60	43.004.60.121
	CH 14	34 cm	60	43.004.60.141
	CH 16	34 cm	60	43.004.60.161

Advantages at a glance

- no disconnection of the tube
- continuous ventilation
- no PEEP loss
- no drop in saturation
- secretion control
- reduction of cerebral pressure
- improved patient tolerance
- extra-soft sleeve
- replacement interval 48 hours
- **DEHP-free**
