

Protective Covers for Ultrasound Probes

Cardiology/TEE

Cardiology/TEE

DAHLHAUSEN offers a comprehensive portfolio of disposable protective covers and accessories fitting most commonly used ultrasound transducers. Probes are protected by covers. The Dahlhausen ultrasound probe covers provides protection against cross-contamination for both patient and staff, increases efficiency and extends the shelf life of your expensive equipment.

REF 42.202.25.103

The Dahlhausen Trans Esophageal Echocardiography (TEE) covers feature a tapered design to provide a tight fit to most commonly used TEE-transducers. Available in latex and latex-free material both sterile and non-sterile. They can be ordered individually or as a complete set with locking clip, syringe with ultrasound gel and a bite guard. These sets are available as KIT (pre-assembled) and TRAY (individual components in thermo-formed packaging).
