THE HEGENBERGER RETRACTOR

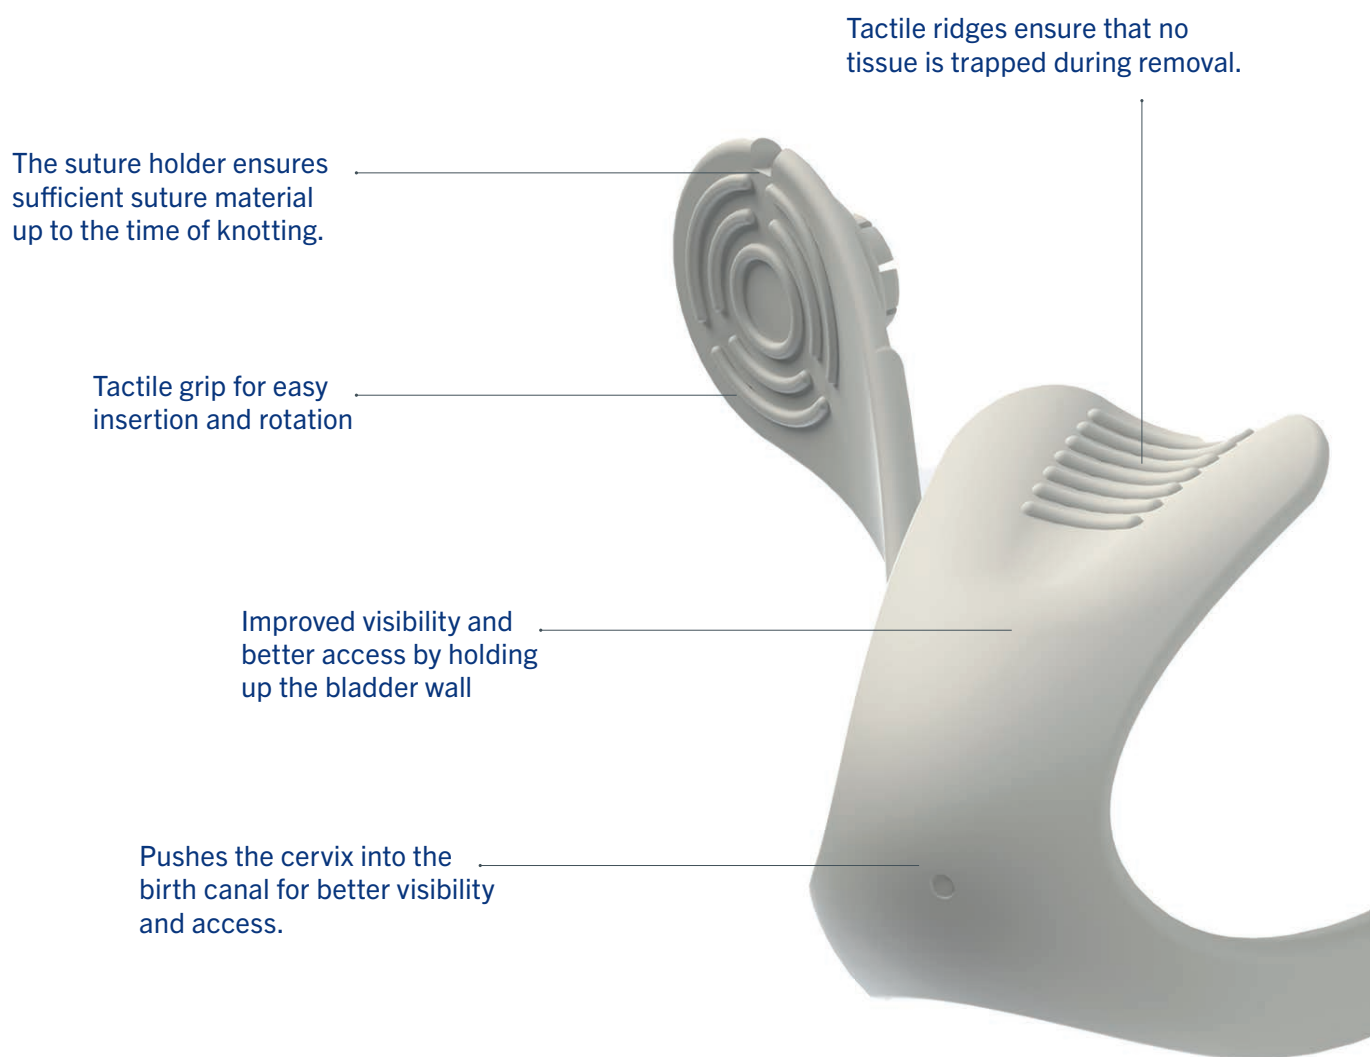

Innovative vaginal retractor

 **DAHLHAUSEN®**

THE HEGENBERGER RETRACTOR

AN INNOVATIVE VAGINAL RETRACTOR THAT DRAMATICALLY IMPROVES VISIBILITY AND ACCESS FOR POSTPARTUM TEARS AND EPISIOTOMIES.

Drawing on 20 years of suturing experience, Scandinavian clinician Malene Hegenberger designed an innovative retractor, to make better use of her fingers during suturing. The retractor was designed to optimise and revolutionise the suturing process for clinicians.

LEAVES HANDS FREE DURING SUTURING

100 % of clinicians

were of the opinion that the device allowed clear visibility of trauma during use.¹

91 % of clinicians

using the device for the first time said it was well accepted by patients.¹

94 % of clinicians

are of the opinion that the retractor will minimise the risk of needlestick injury.²

94 % of clinicians

are of the opinion that the retractor allows them to suture in a more timely manner.²

THE HEGENBERGER RETRACTOR | ADVANTAGES

REF 25.200.01.390 | PU 10 pieces

ALL THE ADVANTAGES AT A GLANCE

- + No need for a second pair of hands to retract the wound
- + Both hands are free to suture the patient
- + Improves the training of junior medical professionals
- + Provides for a safe working environment
- + Improves visibility
