

Closed patient suction system

Closed suction

A whole range of problems are encountered during long-term ventilation in everyday hospital practice. We have developed the OptiFlo closed suction system in order to make ventilation especially safe and hygienic, both for patients and nursing staff.

Bronchoscopy device and lockable rinsing chamber

In answer to user needs, we have now extended the service life of our OptiFlo to 168 hours, and in addition to the lockable rinsing chamber we have also developed a bronchoscopy device. As a result, OptiFlo is even safer whilst remaining perfectly simple to use.

In addition, its new features means it saves time and storage space in your hospital.

Bronchoscopy device

- 168 hours usage reduces costs
- easy to implement
- no reflux in the trachea
- more hygiene & safety

Lockable rinsing chamber

Atraumatic catheter tip

Secretion sight glass

Aerosol dosage adapter

Adult

	Size	Length	Packaging unit	REF
	CH 10	59 cm	50	43.004.56.100
	CH 12	59 cm	50	43.004.56.120
	CH 14	59 cm	50	43.004.56.140
	CH 16	59 cm	50	43.004.56.160

Adult, extra-long version

	Size	Length	Packaging unit	REF
	CH 14	65 cm	50	43.004.56.142
	CH 16	65 cm	50	43.004.56.162

Adult, tracheostomized patients

	Size	Length	Packaging unit	REF
	CH 12	39 cm	50	43.004.56.121
	CH 14	39 cm	50	43.004.56.141
	CH 16	39 cm	50	43.004.56.161

Advantages at a glance

- no disconnection of the tube
- continuous ventilation
- no PEEP loss
- improved PEEP seal
- no drop in saturation
- secretion control
- reduction of cerebral pressure
- improved patient tolerance
- extra-soft sleeve
- **lockable rinsing chamber**
- **bronchoscopy device**
- **DEHP-free**
- replacement interval 168 hours
