

Protective Covers for Ultrasound Probes

Gynecology/Urology

Gynecology/Urology

DAHLHAUSEN offers a comprehensive portfolio of disposable protective covers and accessories fitting most commonly used ultrasound transducers. Sonic heads are protected by covers. The Dahlhausen ultrasound probe covers provides protection against cross-contamination for both patient and staff, increases efficiency and extends the shelf life of your expensive equipment.

REF 42.200.30.200

REF 42.200.13.055

REF 42.200.30.201

For use during transvaginal and transrectal ultrasound examinations. Distribution and routing of ultrasound waves are optimally ensured by the thin but extremely tear-resistant material quality of the covers. The tight fit of the covers keeps the transmission in gel in place ensuring an optimal ultrasound image. The protective covers are partially or totally rolled.

Protective covers for vaginal and rectal ultrasound probes

Description	Material	Sterility	PU	REF
Protective cover for ultrasound probe, 20 x 200 mm	latex	no	2.000	42.200.20.202
